

# Clamshell Card

## Robust and smart access control solution

Linxens Clamshell Card is a robust though easy to handle product for access control applications.

Carried in the wallet or purse, Linxens Clamshell Card offers enhanced user convenience for secure access control. Made of hard shell ABS, the contactless card is a robust and durable solution even in harsh environments.

Linxens Clamshell Card can be easily adapted to client specific designs with the option to print or embed a logo on its surface.

Dimensions	Thickness	Operating Temperature	Available ICs
85.8 x 54.0 mm / 3.37 x 2.13"	1.6 mm / 0.06"	-35°C to +60°C / -31°F to 140°F	Atmel ATA5577

Additional memory, protocol and product configurations are available upon request.  
Other chip types are available upon request.

### Overview

#### Operating Frequency

- 125 kHz

#### Operating Temperature

- -35 to 60°C / -31 to 140 °F

#### Material

- ABS - hard shell (white)
- PVC - sticker on the back side

#### Application Area

- Access Control

#### Benefits

- Reliable solution
- User convenience
- Durability even in harsh environments
