

## LINXENS JOINS THE UNITED NATIONS GLOBAL COMPACT

Paris, November 2<sup>nd</sup>, 2017

**Linxens, a leader in the design and manufacture of microconnectors and RFID Antennas & Inlays and LED lighting solutions, joins United Nations Global Compact, the largest international voluntary corporate sustainability initiative.**

### **A strong commitment in terms of Corporate Social Responsibility for the Group**

Linxens is fully committed to its Corporate Social Responsibility towards all the Group's stakeholders and believes that setting high standards in terms of ethics and business integrity is part of its sustainability approach. It was therefore natural for the Group to decide to join the United Nations Global Compact.

The United Nations Global Compact brings together 14,000 companies, organizations, UN agencies, and stakeholders from both the world of work and civil society. It is based on ten universally recognized principles derived from human rights, international labor laws, the environment, to the fight against corruption.

Signatories of the United Nations Global Compact need to make sure that human rights are respected and reject any abuse. They need to allow the freedom of association and the right for collective bargaining. Neither forced nor child labor are tolerated, along with any other form of discrimination. It is also important that businesses take into account environmental challenges, and put in place initiatives and technologies to promote greater responsibility. Lastly, businesses must apply an anti-corruption policy.

### **Linxens pledges to respect and apply those principles**

Through its adherence, Linxens has undertaken to integrate the ten principles into its strategies, policies, and procedures and to share all progress made on a yearly basis, through the annual Communication on Progress report.

Linxens has also become member of Global Compact France, the local French network, in order to help them achieve their targeted objectives.

More generally, Linxens is proud to be a member of the Global Compact and to promote the values in its sphere of influence, and integrate the ten principles in its industrial activities worldwide.
