Electronica 2018: Linxens: experts in secured connections, partners in innovation

Linxens, a world-class leader in the design and manufacture of Microconnectors for smartcards and RFID Inlays and Antennas, has chosen Electronica to unveil its complete offering of component-based solutions for the security & identity market.

Operating over a number of market segments (telecom, financial services, access control, eGovernment, healthcare, transport, IoT, hospitality, leisure and entertainment), Linxens wishes to share with all the visitors to the Electronica trade fair, the specificities of its products, in a world of electronics where reliability, quality and security of data exchange are more than ever crucial.

Electronica is the ideal event for Linxens to reveal its new solutions for Microconnectors and RFID antennas, including its full solutions, which include design and fast prototyping.

Building on its technical “chip on flex” expertise, Linxens has also developed an exclusive range of LED light sources on flexible substrate. Its new product range, Liine, will also be showcased during the event. 100% *Made In France*, Liine offers a strip of continuous light, particularly suited to high-end architectural projects. Colorimetry can be adapted to demand to comply with all requirements.

The Linxens team will welcome you on the Business France stand (Booth 444/4) Hall A1 throughout Electronica 2018, from 13 – 15 November 2018.

We design and manufacture Microconnectors for smartcards and RFID Antennas and Inlays.

Linxens believes in innovation. We are a team of doers who relentlessly work to achieve excellence.

We are the leading solution-provider for telecom, financial services, access control, eGovernment, healthcare, hospitality, leisure & entertainment, IoT and transportation markets.

We also use our technical expertise to offer innovative LED lighting solutions.

With 7 production facilities in Asia and Europe, 4 R&D Centers, and over 3000 employees, Linxens makes its large-scale production capacity available to its

customers, and delivers guaranteed product and technical reliability. More than 6 billion people worldwide use Linxens products every day. Linxens technology gives users the best connection possible. These connections affirm our commitment to the future, and our expertise in creating technology that serves the people.

Linxens crafting the future of connections
