LINXENS PRESENTS ITS SECURE CONNECTIVITY SOLUTIONS AT SDW 2019, LONDON

Linxens, a global leader in the design and manufacture of RFID Antennas and Inlays announces its presence at SDW 2019, London from 11-13 June.

The trend is clear. The world is increasingly mobile and modern RFID technology continues to redefine travelling worldwide. While electronic passports have been introduced in numerous countries around the world, governments are now introducing further contactless identification documents based on RFID in order to increase their security and thwart the efforts of counterfeiters.

Linxens provides high security, integrity and trust for electronic Identity Documents with a wide range of RFID Antenna and Inlay solutions, manufactured in a Common Criteria EAL 6 certified environment.

DataPage Inlays, the world's thinnest electronic Inlays

High-end travel documents are increasingly required to have a secure DataPage component. With rising expectations for security and durability, Linxens offers a DataPage Inlay solution that meets the stringent requirements of security printers and governments around the world. Available with or without an integrated hinge.

PC PRELAM[®] with SMART-AC, the versatile and slim Inlays

Linxens' PC PRELAM product family provides card manufacturers and security printers with a pioneering product range to meet tomorrow's requirements for versatile high-security contactless identity documents. Linxens' PC PRELAM Inlays offer an optional Anti-Crack feature and a 10-year warranty.

dLoc[®], the blockchain-based document authentication solution

dLoc allows any issuer of critical documents to make its certificates unforgeable and their history completely untraceable, thanks to an adhesive seal containing a chip and an RFID transmitter. Using the security of blockchain technology and the convenience of Near Field Communication (NFC), any document can be digitally stored, shared and verified in real-time using a mobile device.

Join Linxens' experts at SDW 2019 in London from 11-13 June, to find out more about Linxens' complete range of solutions for the secure ID and document markets. You'll find us on Booth S77.

About Linxens

Linxens, a leading technology company providing component-based solutions for security and identification, is a world-class specialist in the design and manufacture of Microconnectors for smart cards and RFID Antennas and Inlays. With over 100 billion Microconnectors and 4 billion RFID Antennas supplied to date, Linxens is the preferred supplier of many of the world's technology pioneers shaping the markets of telecom, transport, hospitality, leisure & entertainment, financial services, eGovernment, access control, healthcare and Internet of Things (IoT).

Linxens employs over 3,000 people worldwide, with four R&D centers and seven manufacturing locations across Europe and Asia.
