## Linxens site in Ayutthaya, Thailand receives MasterCard CQM certification for Interactive Inlays

Linxens' manufacturing site in Ayutthaya has successfully completed its new **MasterCard CQM certification for Interactive Inlays (IACI)**.

With the next generation of cards, including biometric or dCVx cards, expected to become mainstream in the coming years, MasterCard has extended its Card Quality Management program (CQM) towards this new product range.

The new IACI label is specifically designed to cover all the quality and durability aspects relevant to such new products. It ensures that the product will survive the wear and tear of daily use through its lifetime out in the field.

### About Linxens

Linxens is a leading technology company providing secure component-based solutions for security and identification.

A world-class specialist in the design and manufacture of Microconnectors for smart cards and RFID Antennas and Inlays, Linxens' portfolio also includes module packaging.
